Subject: **Notice of Un-metered and/Or Unapproved Service**
Your Action Required to Continue Electric Service
Service Account No: 3-030-1524-39

Dear Valued Customer:

Southern California Edison Company (SCE) recently discovered that your electric service is currently metered without an approved inspection by your city and county. This notice is to make you aware that an unapproved electric service is in violation of the California Utilities Commission (CPUC) approved tariffs and local ordinances put in place, in part for public safety.

A meter must be installed and an appropriate city or county inspection must be obtained in order to provide you with safe electrical service and an accurate billing of your usage. Our records indicate that a final city or county electrical inspection of your premises has not been received. SCE is obligated to follow rules established by the CPUC as well as by local ordinances.

Edison is unable to continue electrical service if an inspection is not received within 10 business days of the delivery of this letter. If a final electrical inspection has already taken place, please have the city or county notify SCE immediately so your service is not interrupted. Even if your service is currently metered, if your city or county Building & Safety does not approve of your service installation, SCE may be required to disconnect your electric service.

As an alternative to service disconnection, you or your electrician can make arrangements with SCE for temporary, metered power until your service is restored to a condition that passes required inspection and is metered with a permanent connection. If your service is un-metered, SCE has the right to issue you an estimated bill until your service installation is complete, inspected and metered.

Should you have any questions, please do not hesitate to call 323-720-5220.

Sincerely,

Marcela Zapién
